— A BRAND BOOK

A warmer kind of *clinical*.

CosMedic is the cosmetic-surgery practice managed by BIMC Hospital — ISAPS-credentialed, considered, *sanctuary-feeling*. These pages set the marks, colours, and type that make every surface read the same way.

— LOCKUP

One lockup, *two surfaces.*

The wordmark pairs the BIMC medical cross with a profile silhouette. *Managed by BIMC Hospital* sits beneath, always — the endorsement is part of the mark.

PRIMARY · ON #1F1B16 /
LIGHT #F4EFE6

INVERSE · ON #F4EFE6 /
DARK #1F1B16

— CLEARSPACE

Reserve a single
X of breathing
room.

Where *X* equals the height of the medical cross in the mark. No type, image, or graphic element may enter the dashed frame.

MINIMUM SIZE · SCREEN

96 px *wide*

MINIMUM SIZE · PRINT

24 mm *wide*

— DON'TS

Treat the lockup as *fixed*.

Four common ways the mark gets broken in the wild.
Hold the line. If a surface forces a compromise,
choose a different surface.

× 01

DON'T SKEW

× 02

DON'T STRETCH

× 03

DON'T RECOLOUR

× 04

DON'T CRUSH
CONTRAST

— PALETTE

Five colours, *one rhythm.*

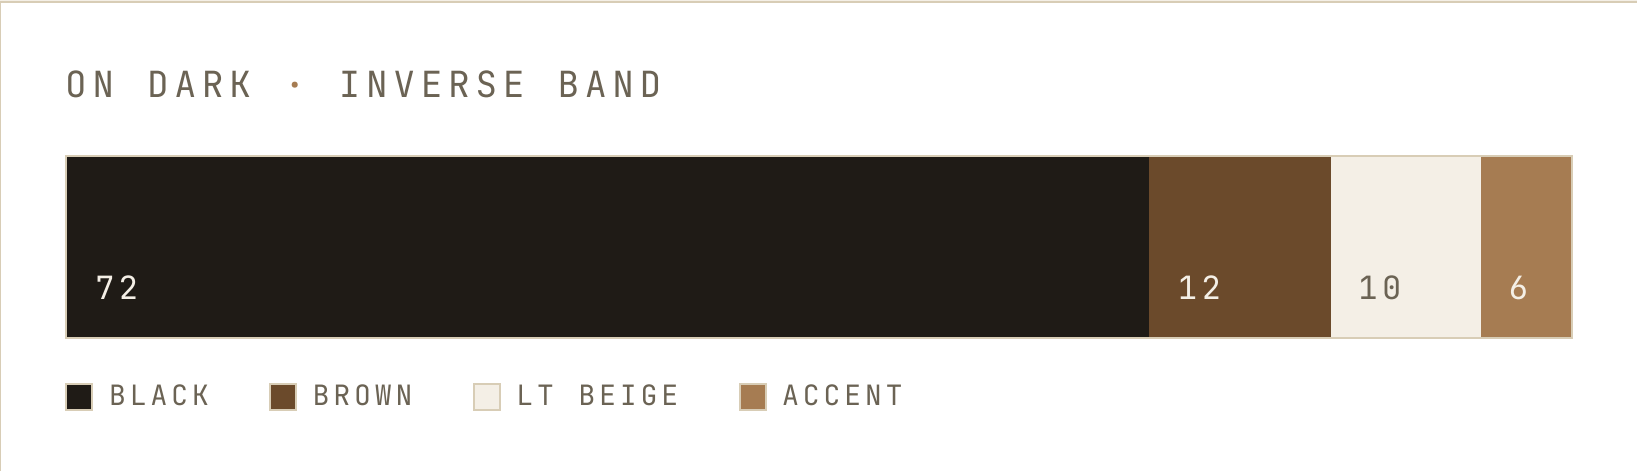

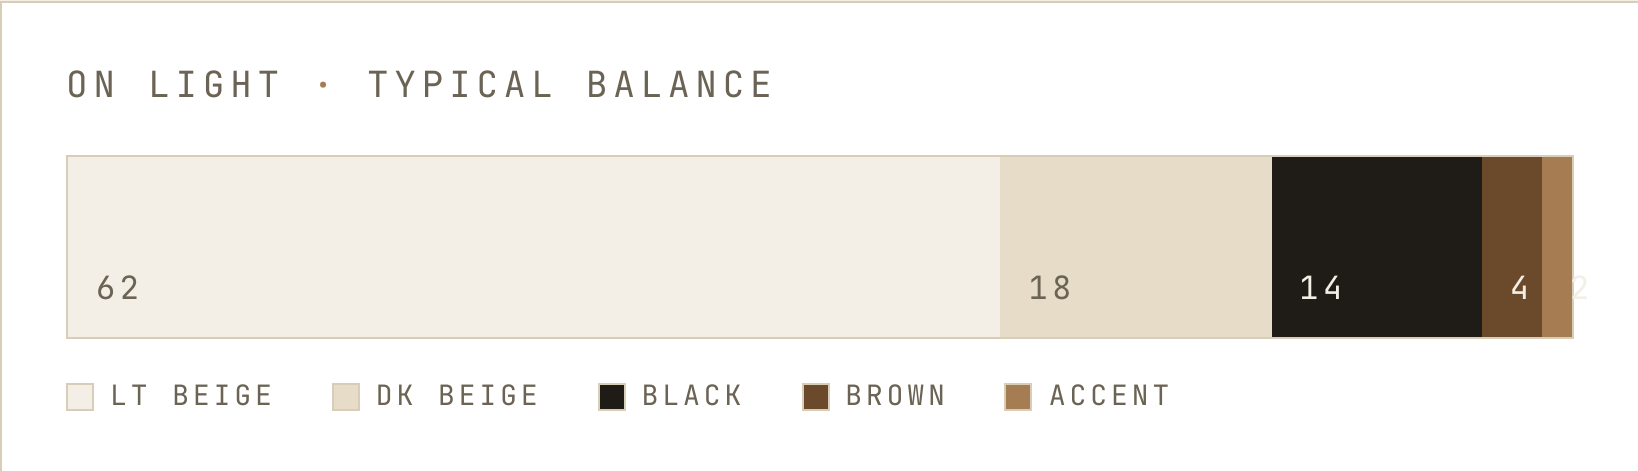

v1.4 consolidates seventeen tokens down to five surface colours plus one bronze accent. *Closest to today, keeps the warm-beige editorial DNA, drops the unused middle tones.*

BLACK --BLACK #1F1B16 Body copy on light; dark surfaces.	BROWN --DARK-BROWN #6B4A2B Primary buttons; eyebrow rules.	ACCENT --ACCENT #A67C52 Italics, links, the single highlight.	DK BEIGE --DARK-BEIGE #E6DCC8 Stat rows; image fallbacks.	LT BEIGE --LIGHT-BEIGE #F4EFE6 Default page background.
---	---	--	--	--

— DISTRIBUTION

Beige first.
Ink second. *One bronze gesture.*

A page should read warm-beige and ink first; the bronze should appear only where the eye needs to land — *an italic word, a link, the rule beside an eyebrow label, one primary CTA.*

*Treat the accent as a **condiment**, not a colour-block. One bronze gesture per surface — never two competing.*

— TYPOGRAPHY

A serif for the *warmth*.
A mono for the *record*.

Two families do everything. The serif italic does the emotional work. The mono pins the page to its *medical-record voice*.

— SCALE

Six steps,
no more.

From display to label, six sizes carry every surface. *Don't invent in-betweens* — restraint here is what gives the brand its calm.

SIZE	ROLE	FAMILY	SPECIMEN
110	DISPLAY	CORMORANT 500 / 500I	A warmer kind of <i>clinical</i> .
64	H1	CORMORANT 500 / 500I	Fewer colours, <i>more rhythm</i> .
36	H2	CORMORANT 500	A serif for the warmth, a mono for the record.
21	BODY	CORMORANT 400	Conservative breast surgery — augmentation, lift, reduction, refinement.
14	CAPTION	CORMORANT 400 ITALIC	<i>Sized to your anatomy by ISAPS-credentialed surgeons.</i>

SET IN

Cormorant Garamond

JetBrains Mono

Set in Cormorant
Garamond and
JetBrains Mono, on
warm-beige paper.
*Compiled 19 May
2026.*

For any surface this document doesn't cover — favicon, social card, signage, stationery — apply the same rules: *warm-beige first, ink second, one bronze gesture*. The mark always carries the BIMC Hospital endorsement.
