

Website Optimization Audit & Roadmap

BIMC CosMedic - Performance Strategy 2024

Executive Audit Summary

This report outlines the strategic improvements required for the BIMC CosMedic website (staging version) to enhance patient trust, increase conversion rates for international medical tourists, and improve organic search visibility.

1. UI/UX (User Experience) Improvements

- **Dynamic Before & After Gallery:** Implement a filterable, high-resolution gallery categorized by procedure. Add "Side-by-Side" comparison sliders to visualize results effectively.
- **Mobile-First Optimization:** Ensure all high-impact assets (Crisalix 3D imaging) are optimized for mobile loading speeds and touch-based navigation.
- **Surgeon Authority Pages:** Create individual landing pages for surgeons detailing ISAPS credentials, international training, and personal video introductions.
- **Visual Trust Signals:** Prominent placement of ACHSI accreditation and international medical awards in the global header/footer.

2. Sales Funnel Optimization

- **Virtual Consultation Path:** Implement a specialized multi-step form allowing international patients to upload photos for preliminary assessment.
- **WhatsApp Integration:** A persistent, non-intrusive floating WhatsApp button to cater to the Bali/Australian market preference for instant messaging.
- **Medical Tourism Concierge:** Add a dedicated "Bali Recovery" section covering airport transfers, partner hotels, and post-op care packages.
- **Transparent Pricing:** Use "Starting From" price points to qualify leads and reduce friction during the inquiry process.

3. SEO Strategy (Search Engine Optimization)

- **E-E-A-T Compliance:** Ensure all medical content is "Medically Reviewed" by a credentialed surgeon with schema markup.
- **Geo-Targeting:** Develop landing pages specifically for the Australian and Expat markets (e.g., "Bali Plastic Surgery for Australians").
- **FAQ Schema:** Implement structured data for procedure FAQs to capture Google Featured Snippets and "People Also Ask" boxes.
- **Video SEO:** Host surgeon Q&A videos to increase "Time on Page" and rank within video search results.

4. 30/60/90-Day Implementation Roadmap

Phase	Key Actions	Priority	Goal
Day 0-30: Foundation	• Technical SEO Audit & Speed Fixes • WhatsApp CTA Integration • Trust Signal Placement (Accreditations) • Contact Form Optimization	High	Fix conversion leaks and technical barriers.
Day 31-60: Conversion	• Launch New Before & After Gallery • Create Surgeon Profile Pages • Develop Australia-specific Landing Pages • Launch "Virtual Consultation" Form	High	Build trust and streamline the lead path.
Day 61-90: Authority	• Video Content Production (Surgeon Q&As) • Advanced FAQ Schema Implementation • Medical Tourism Concierge Guide • Review Acquisition Campaign	Medium	Dominate search and long-term retention.
